## SpencerLab Completes Study for Hewlett-Packard Comparing 11 x 17" Color InkJet Printers

*Melville, NY, February 18, 1998* - The *SpencerLab* Digital Color Laboratory, a division of Spencer & Associates Publishing, Ltd., today announced that it has completed a comparative study of 11 x 17" color inkjet printers, sponsored by Hewlett-Packard.

Hewlett-Packard's related press release is currently available on the World Wide Web at [Yahoo's Business Wire news site](#).

Test and analysis included cost-per-page, and overall throughput speed at comparable quality. The study included the Canon BJC-4650 (successor to the BJC-4550 and now available in Europe, Asia Pacific, and Japan), the Epson Stylus Color 1520, and the HP DeskJet 1120C, introduced today.

*SpencerLab* provides product test and evaluation services, product test software, and comparative product test reviews to the digital color peripheral industry. An independent testing facility, *SpencerLab* specializes in testing printers and related areas of expertise. By providing accurate testing using a solid base of test software, print samples, and proven methodologies, *SpencerLab* offers reputable objective results suitable for publication. Additional information is available on the World Wide Web at [www.spencerlab.com](http://www.spencerlab.com).

Focused on digital color technology, Spencer & Associates consults with organizations for whom printing is mission-critical, providing workflow analysis and print system selection, and consults with product vendors, providing product development and strategic support to improve quality and performance. Additional information is available at [www.spencer.com](http://www.spencer.com) on the World Wide Web.
