HP HOME PRINTERS. THE FUEL EFFICIENT WAY TO SAVE ON RUNNING COSTS.

In usage in a printer is like the petrol you use in your car. Modern cars improve efficiency and performance, so you can go further for less.

HP fuel efficient printers and inks do the same:

- Use less ink for maintenance, leaving more for printing
- By cutting ink wastage, running costs are reduced
- **Create twice as many prints using the same amount of ink***
- Outperform other brands without compromising quality
- Save money with every print.
